Windows Loader v2.2.2

The safe and easy way to activate Windows.

About

This is the loader application that's used by millions of people worldwide, well known for passing Microsoft's WAT (Windows Activation Technologies) and is arguably the safest Windows activation exploit ever created. The application itself injects a SLIC (System Licensed Internal Code) into your system before Windows boots; this is what fools Windows into thinking it's genuine.

The things you might want to know

- It works on 32-bit and 64-bit systems
- It's compatible with Windows 7 SP1 and all system updates
- It's compatible with all system languages
- It can be used to pre-activate Windows
- It allows you to install custom OEM information
- It features application integrity checking
- It supports hidden partitions and some complex setups
- It can work alongside Linux's GRUB or any other boot manager
- It works with VMware, VirtualBox and Hyper-V
- It works with most hard drive encryption software e.g. TrueCrypt or BitLocker
- It allows you to add your own certificates and serials externally
- It will install just the certificate and serial for users with an existing SLIC
- It features automated system profiling (The application matches everything up for you)

- All key parts of the loader are encrypted with a custom encryption
- Every user has a unique version of the loader installed on his or her system

Supported operating systems

- Windows 7 Ultimate
- Windows 7 Ultimate E
- Windows 7 Professional
- Windows 7 Professional E
- Windows 7 Home Premium
- Windows 7 Home Premium E
- Windows 7 Home Basic
- Windows 7 Starter
- Windows 7 Starter E
- Windows Vista Ultimate
- Windows Vista Business
- Windows Vista Business N
- Windows Vista Home Premium
- Windows Vista Home Basic
- Windows Vista Home Basic N
- Windows Vista Starter
- Windows Server 2008 Enterprise
- Windows Server 2008 Enterprise (Without Hyper-V)
- Windows Server 2008 Foundation
- Windows Server 2008 Standard
- Windows Small Business Server 2008
- Windows Storage Server 2008 Standard
- Windows Storage Server 2008 R2 Essentials
- Windows Server 2008 R2 Enterprise
- Windows Server 2008 R2 Foundation
- Windows Server 2008 R2 Standard
- Windows Server 2008 R2 Datacenter
- Windows Small Business Server 2011 Standard
- Windows Small Business Server 2011 Essentials
- Windows Home Server 2011
- Windows Server 2012 Standard
- Windows Server 2012 Essentials
- Windows Server 2012 Foundation
- Windows Server 2012 Datacenter
- Windows Storage Server 2012 Standard
- Windows Storage Server 2012 Workgroup
- Windows MultiPoint Server 2012 Standard
- Windows MultiPoint Server 2012 Premium
- Windows Server 2012 R2 Standard

Application integrity checking?

Hover your mouse over the green, amber or red icon to see detailed application

the location from which you launched the application. You should also check that the applications MD5 matches the MD5 found online.

Download
